IDEATION PHASE

Brainstorm & Idea Prioritization Template

Date: 28 October 2026	**Team ID:** Individual Project
Project Name: Health360_HealthCare_Analysis	**Maximum Marks:** 4 Marks

Brainstorm & Idea Prioritization Template

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. This template structures the ideation and analytical design choices for the Health360 Healthcare Analysis capstone project to address the early detection of chronic conditions (Heart Disease, Diabetes, Stroke) through interactive Tableau visualizations.

Step 1: Brainstorm and Idea Listing

List out as many ideas as possible without judging them at this stage to cover all key project scenarios and dataset dimensions.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Individual Analyst	Clinical Risk Assessment & Early Detection Dashboard: Build interactive KPI metrics and scatter plots (Blood Pressure vs. Glucose) to identify high-risk chronic disease patients (Dr. Michael Carter scenario).	Clinical Risk & Diagnostics	1
2	Individual Analyst	Lifestyle & Behavioral Impact Analysis: Analyze disease occurrence against lifestyle choices (Smoking habits, Alcohol consumption, Exercise levels, Fatigue patterns) using heatmaps and stacked bar charts (Emily Rodriguez scenario).	Behavioral Analytics	2
3	Individual Analyst	Demographic & Vulnerable Segment Profiling: Evaluate disease prevalence across age distributions and BMI categories (Obese, Overweight, Normal, Underweight) using color intensity tables and distribution curves (Dr. Priya Nair scenario).	Public Health & Demographics	3
4	Individual Analyst	Comprehensive 360° Tableau Dashboard Integration: Combine Clinical Risk, Lifestyle Trends, and	Integrated Solution	4

		Demographic Segmentations into a unified Tableau story/dashboard for holistic proactive healthcare management.			

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Clinical Risk Assessment Dashboard (Glucose, BP, Cholesterol KPI tracking)	High	High	P1	**Yes**
2	Lifestyle & Behavioral Correlations (Smoking, Exercise Level, Alcohol vs. Chronic Conditions)	High	High	P2	**Yes**
3	Population Demographics & BMI Vulnerability Profiling	High	Medium	P3	**Yes**
4	Unified 360° Interactive Tableau Dashboard (Combining Groups 1, 2, & 3 into a multi-tab visual solution)	High	High	P4	**Yes**
