HEALTHCARE ANALYTICS CAPSTONE PROJECT

Project Demo Planning Report

Date	28 October 2026
Team ID	Individual Project
Project Name	Health360_HealthCare_Analysis
Author / Analyst	Kriti Bhandari
Domain	Healthcare Analytics
Maximum Marks	1 Mark

Project Demo Planning

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Context & Problem Statement	Introduction to chronic condition risks (Diabetes, Heart Disease, Stroke) across the N=5,000 patient cohort and persona alignment (Dr. Carter, Emily Rodriguez, Dr. Priya Nair).	2	Kriti Bhandari
2	Data Engineering & Architecture Overview	Demonstration of Snowflake data pipeline (RAW -> STAGING -> CLEAN -> CURATED -> MART), null imputation, deduplication, and schema validation.	3	Kriti Bhandari
3	Clinical Risk Assessment Dashboard	Walkthrough of high-level KPI cards (Diabetes 34.92%, Heart 29.98%, Stroke 24.86%) and interactive Systolic BP vs. Glucose scatter plot	4	Kriti Bhandari

		with risk tooltips.		
4	Lifestyle & Behavioral Correlation Analysis	Demonstration of heatmaps and comparative charts examining disease rates against Smoking Status (31.2% vs 28.7%) and Exercise Level distribution.	3	Kriti Bhandari
5	Population Demographics & Vulnerability Profiling	Visual review of disease intensity across Age Groups (Senior & Old cohorts up to 100% co-occurrence) and BMI categories (Obese 39.98% risk).	3	Kriti Bhandari
6	Tableau Storyboard Integration & Q&A	Interactive narrative presentation of the 8-view Tableau Visual Story ('Story 1') followed by stakeholder discussion and concluding feedback.	5	Kriti Bhandari

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Present background on healthcare costs, delayed chronic disease detection, and target personas using executive slides.
2	Solution Overview	Showcase Snowflake ETL pipeline execution, data quality audit scripts, and data mart creation.
3	Live Feature Demonstration	Navigate through live interactive Tableau dashboards ('Story 1'), applying dynamic filters across BMI, Smoking, Age Bins, and BP vs Glucose scatter charts.
4	Q&A Session	Address technical and domain questions regarding query latency (45-120 ms), HIPAA data privacy compliance, and future predictive ML integration.
